TagsMaps	
task_id	fk_ref(Tasks)
tags_id	fk_ref(Tags)
task_id, tags_id	primary key

Prioity	
priority_text (PK)	priority_value
High	3
Medium	2
Low	1

Reminder	
(reminder text) P	value
once a day	daily
once an hour	hourly
once every min	byminute

The actual implementation does not strictly follow this schema, like subtasks will go inside tasks as JSON and tags as well.
